This modern centre has been equipped with the best in terms of tools and equipment. This centre is fully accredited by Merseta as a training provider and decentralized trade test centre. This centre provides high quality training to apprentices and artisans in the automotive industry, with the emphasis on the maintenance and repair of Diesel, Motorcycles, Auto Electrical and Forklift Trades. The trainers in all our academies are all registered with Merseta as assessors and moderators.

APPRENTICE TRADES OFFERED

- Diesel CBMT Apprenticeship
- Motorbike & Scooter CBMT Apprenticeship
- Auto Electrical & Autotronics CBMT Apprenticeship
- Forklift CBMT Apprenticeship
- Automotive related short courses

SHORT COURSES OFFERED

- After market Fitment agent NQF2 - fitters of electronic / after market components to vehicles.
- Chassis fitment agent NQF2 - fitters of bull bars, tow bars, exhaust pipes, welding, bumper replacements.
- Technical for non Technical NQF2 - warranty clerks, parts and service, non technical managers over technical staff, service advisors.
- Autotronics NQF 5 - Advanced diagnostic technician.
- Workplace mentor program NQF 5 - Train shop managers to mentor apprentices and learners in the workplace.

Section 28 - Recognition of staff who have more than 6 years workplace experience with no qualification requirements.

HOLISTIC TRAINING AND ASSESSMENT

Our instructors are highly experienced and qualified technicians who provide our students with extensive one on one practical and theoretical coaching and training. As registered assessors, they conduct pre-trade tests and full assessments, ensuring our artisans meet all institutional training requirements. Psychologists are also available to provide psychometric/aptitude assessment on request.

OUR CURRICULA

In addition to a strong technical knowledge, our students receive invaluable exposure to a well-rounded knowledge base, which includes interpersonal skills and an understanding of the various business functions. Our curricula are designed to deliver competent artisans that meet the requirements of today's technological advancement.

ENTRANCE CRITERIA

Applicants must have achieved the following qualifications to be considered for an apprenticeship:

- Matric certificates with Maths and Science and English with a minimum 50% pass on Standard Grade.
- The Applicant will be required to take a mechanical insight test and pass sufficiently.
- The Applicant will go through the standard background checks before being considered for the next step.
- Applicants that are successful will be placed through a Psychometric assessment and a face to face interview.

CURRICULUM DEVELOPMENT

The management and staff at the Wadeville Academy have many years of experience between them in their respective trades. They have teamed up with other industry specialists and International Publishing Companies to rewrite the out of date curricula and produce sets of CBMT aligned training materials for apprenticeships.

They have already tackled Heavy Vehicle and have a set of 4 textbooks aligned to each of the levels for Diesel Apprentices. In the pipeline are Motorcycle and Scooter curricula, Panel Beating and Spray Painting, Forklift and Auto Electrical and Autotronics. Just another way in which IMPERIAL Technical Training Academies are redefining the technical training landscape.
